User stories

- As a user, I would like to add comments, so I can express myself.
- As a user, I would like to list all the comments I did before, so I can review my words.
- As a user, I would like to delete my comment, so I can delete something that I did without intention.

Requirements

- The app has to be written in Javascript with some of its modern flavors (es6, es2018, etc).
- The source code has to be in Github as a public repository under your username.
- The [frontend](#) and [backend](#) have to be deployed in [Heroku](#).

Frontend

- Components has to be written in [React](#).
- Use [Styled Components](#) to style the components, plain css files are prohibited.
- Use [Apollo Client](#) to consume the GraphQL API you have built.

Backend

- Build the API using [graphql.js](#), other libraries or tools are not allowed.
- Mutations and Queries have to be tested using [Jest](#).
- Use [MySQL](#) as database and [Sequelize](#) as the ORM.

Deadline

5 days from date of receipt.

What do we evaluate?

Good code and capability to learn and grasp new technologies.

if you have any questions please ping us at jobs@riqra.com with [#riqrachallenge](#) as subject. Good luck!
